

Solenergy systems inc Yemen

De La Salle University awarded the design and installation of a grid-tied rooftop solar to Solenergy during the construction phase of the project. Working closely with the lead contractors and architects of the project, our design team mainly maximized the available rooftop space of the 1,395 square-meter building.

The solar modules that comprise the system are connected to three 3-phase inverters that will power up the administration building of PEDC in Iloilo City. In line with their campaign to propel pro-environmental programs while maintaining stable power supply, the system is designed to generate electricity for 70% of the entire building.

Japan Tobacco International (JTI), one of the largest tobacco companies in the world, has a single roof structure which features the largest self-consumption rooftop solar PV system in the Philippines at 4.77 MW peak.

Formosa Power Supply Corp (FPSC), in collaboration with EPC partner Solenergy Systems Inc, spearheaded the development of a 924KWp DC solar power project in Mabalacat, Pampanga. This initiative reflects FPSC's commitment to sustainable energy solutions, with Solenergy Systems Inc contributing its expertise in engineering, procurement, and construction. The ...

As part of their energy savings and cost reduction campaign, the client approached Solenergy Systems Inc. to provide a turn-key solar power system for a warehouse rooftop at their Metro Manila manufacturing facility. The system comprises 390 polycrystalline solar modules connected to 5 independent 3-phase inverters.

Solenergy Systems, Inc. was founded with the mission of providing cutting-edge solar photovoltaic systems to commercial-industrial power users at financially viable prices. It was formed by a group of like-minded individuals with the desire to provide a practical and sustainable power alternative to the Filipino people.
