South 8 Technologies | 4,198 followers on LinkedIn. Delivering breakthrough energy storage solutions to advance a clean energy future. | South 8 Technologies, Inc. develops, manufactures and licenses LiGas™, the liquefied gas electrolyte for advanced lithium-ion batteries that solves lithium-ion's "fire and ice(TM)" problems. South 8's patented LiGas electrolyte reduces fire risk ...

SAN DIEGO - South 8 Technologies, a pioneer in electrolyte formulations for next-generation lithium batteries, today announced it has raised \$12M in Series A financing, led by Anzu Partners with participation from LG Technology Ventures, Shell Ventures, Foothill Ventures, and Taiyo Nippon Sanso Corporation (TNSC).

South 8 Technologies's latest funding round was a Convertible Note - II for on May 21, 2024. Date. Round. Amount. Investors. Valuation. Valuations are submitted by companies, mined from state filings or news, provided by VentureSource, or based on a comparables valuation model. Revenue. Sources. 5/21/2024. Convertible Note - II.

Unlike common battery electrolytes which are liquid at room temperature, or solid-state electrolytes under development, the team at South 8 Technologies is the first to develop and commercialize a novel, patented Liquefied Gas Electrolyte (LiGas™), for next-generation electrochemical energy storage devices. These non-toxic electrolytes use ...

South 8 will leverage the funding to accelerate the commercialization of its patented Liquefied Gas Electrolyte (LiGas™) technology for high-performance batteries for electric vehicle, grid...

Revolutionary LiGas™ enables Li-ion battery operation in extreme climates with reduced fire risk. All with improved cost. Operate in new environments: bitter cold, scorching heat, underwater and space. The limit: innovators' imagination.

Join South 8 and grow alongside us as we enable our energy transition. Current Jobs Openings We are always looking for bright, passionate individuals to join our team. OPEN POSITIONS & Please be advised that other posted application portals may be illegitimate, not [...]

SAN DIEGO - South 8 Technologies, the San Diego cleantech company innovating liquefied gas electrolytes (LiGas™) for the next generation of safer and high-performing lithium-ion batteries, welcomes intellectual property expert Andrew Filler to its board of directors. Filler is a Partner and General Counsel of Sherpa Technology Group, an IP consultancy for ...

South 8 Technologies, Inc. has developed a novel Liquefied Gas Electrolyte (LiGas (TM)) chemistry for next-generation rechargeable and primary lithium batteries and electrochemical capacitors. The LiGas electrolyte enables a wider operating temperature range of -80 to +60 °C, provides increased energy, and improved safety while maintaining ...

In this interview, Tom Stepien, CEO of South 8 Technologies, discusses how the company's innovative LiGas™ technology is advancing safer lithium-ion battery solutions and addressing challenges across defense, EV, and industrial applications.

SAN DIEGO - South 8 Technologies, Inc. is thrilled to announce the closing of strategic investments from Shell Ventures and Taiyo Nippon Sanso Corporation (TNSC). This funding follows that of Shell's early ...

?About South 8 Technologies South 8 Technologies, Inc. has developed a novel liquefied gas electrolyte product, LiGas ™, to power the next generation of lithium-ion batteries and advance the world's clean energy future. The venture-backed cleantech company's Series A round of \$12 million was led by Anzu Partners with participation from ...

SAN DIEGO - South 8 Technologies, Inc., the San Diego cleantech company innovating safer and higher performance electrolytes for the next generation of lithium-ion batteries, has closed a strategic investment with Lockheed Martin Ventures, the venture arm of Lockheed Martin (NYSE:LMT), a global leader in defense and aerospace technology, with ...

SAN DIEGO, Aug. 16, 2023 - South 8 Technologies, Inc., the San Diego cleantech company innovating safer and higher performance electrolytes for the next generation of lithium-ion batteries, has closed a strategic investment with Lockheed Martin Ventures, the venture arm of Lockheed Martin (NYSE:LMT), a global leader in defense and aerospace technology, with ...

## South 8 technologies Tajikistan

South 8 Technologies will develop high-power lithium-ion battery cells with the capacity to charge rapidly using a novel liquefied gas (LiGas) electrolyte technology. The LiGas electrolyte uses non-toxic and non-corrosive gases, which are already domestically manufactured and widely available, that are liquefied under moderate pressures and can be contained in ...

South 8 Technologies, Inc. develops, manufactures and licenses LiGas™, the liquefied gas electrolyte for advanced lithium-ion batteries that solves lithium-ion's "fire and ice(TM)" problems. South 8's patented LiGas electrolyte reduces fire risk and operates across a wide temperature range, from -60 to 60 °C.

SAN DIEGO - South 8 Technologies, Inc., the San Diego cleantech company innovating safer and higher performance electrolytes for the next generation of lithium-ion batteries, recently expanded its manufacturing facility, corporate offices and team of experts as interest grows in its patented liquefied gas electrolyte, LiGas™. "This expansion allows us to ...
