

# South Sudan temasek energy

Why is South Sudan facing a serious energy crisis?

South Sudan faces a serious energy crisis due to a number of factors, including devastating conflicts (e.g. 1955-1972, 1983-2005 & 2013-present) and reliance on the fossil fuel source. The country has the lowest energy consumption rate in Africa and the highest cost of producing energy (World Bank, 2016).

Where can I find information about energy in South Sudan?

Find relevant data on energy production, total primary energy supply, electricity consumption and CO<sub>2</sub> emissions for South Sudan on the IEA homepage. Find relevant information for South Sudan on energy access (access to electricity, access to clean cooking, renewable energy and energy efficiency) on the Tracking SDG7 homepage.

What is South Sudan's Energy Security?

country's energy security. In the very early moments of its independence, the South Sudanese state benefited considerably from oil production. The country share production (Adeba & Enough Project, 2019:1). However, after neighbor (International Monetary Fund, 2017 :6). through its pipelines. As a response to that situation, the South Sudanese

Why is energy infrastructure underdeveloped in South Sudan?

Partly due to the civil wars (e.g., 1955-1972, 1983-2005 & 2013-present), energy infrastructure remains very underdeveloped in South Sudan. Despite a peace agreement in 2015, which has been revitalized recently, conflict has impeded the country's effort in transitioning to renewable energy.

What is South Sudan's energy potential?

Despite being a young nation, South Sudan has an enormous and diverse energy potential, ranging from nonrenewable energy sources to renewable energy sources. It holds not only a huge amount of oil resources but also has considerable potential in solar energy, wind energy, hydropower, geothermal energy.

Is South Sudan's 308km power line back on track?

"Uganda, South Sudan 308km power line back on track," The East African, June 28, 2023. 20 U.S. Energy Information Administration, "World Oil Transit Chokepoints," July 25, 2017. Lejla Villar, Mason Hamilton, "Three Important Oil Trade Chokepoints are Located around the Arabian Peninsula," Today in Energy, August 4, 2017.

South Sudan faces a serious energy crisis due to a number of factors, including devastating conflicts (e.g. 1955-1972, 1983-2005 & 2013-present) and reliance on the fossil fuel source. The country has the lowest energy consumption rate in Africa and the highest cost of

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total

primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided
