

What is long duration energy storage (LDEs)?

The 2023 NECP proposes a 173% increase (or 85 GW) in renewable capacity by 2030 from current capacities¹; storage² is expected to increase by 487%, or 15 GW from installed capacity. Long Duration Energy Storage (LDES) can ensure renewable energy is utilised in the system while decreasing reliance on CO₂ emitting technologies

Does Spain have long-duration energy storage?

Aurora's analysis of long-duration energy storage in Spain, commissioned by Breakthrough Energy, is available in a free, public report--download it here. Renewable power generation has been at the forefront of Spain's efforts to reduce greenhouse gas emissions over the past two decades.

Could long-duration energy storage reduce economic curtailment in Spain by 2035?

Long-duration energy storage (LDES) offers a vital solution: deploying 15 GW would eliminate economic curtailment in Spain by 2035, accelerating progress to Net Zero and reducing power system costs, Aurora's modelling shows.

What is the long duration energy storage Council?

Today, on Global Energy Storage Day, the Long Duration Energy Storage Council celebrates the pivotal role energy storage solutions play in shaping a sustainable and resilient clean energy future and calls for accelerated action to scale and deploy these vital technologies. © 2024 LDES Council. All Rights Reserved.

Will Spain's plans to expand renewable power capacity lead to a 'economic curtailment'?

Spain's plans to rapidly expand renewable power generation capacity threaten to lead to frequent periods when generators cannot recoup their running costs, resulting in the waste--or "economic curtailment"--of over 5% of total renewable generation in 2025-2035, new analysis by Aurora Energy Research finds.

Can LDEs help reduce energy consumption in Spain?

Aurora Energy Research's report clearly shows that the deployment of LDES reduces the curtailment of renewables in Spain, lowers emissions, facilitates the early phase-out of fossil fuel power generation and serves as a catalyst for the decarbonisation of industrial heat processes.

Glasgow, 10 November 2021 - The creation of the Long Duration Energy Storage (LDES) Council was confirmed today with the signing at COP26 of a Statement of Intent between the 24 founder members, publicly and reciprocally signaling an intention to form officially in Q1 2022. The LDES Council, which aims to replace the use of fossil fuels in meeting energy imbalances with zero ...

By 2030, Spain expects to install 22.5 GW of energy storage projects, including included battery energy storage, pumped hydropower and solar thermal plants. The plan also aims for 76 GW of solar power, 62 GW of wind power, which includes 3 GW of offshore wind, along with 1.4 GW of biomass projects.

The Long Duration Energy Storage Council commissioned this report to demonstrate the current and potential applications for member technologies to decarbonize industry. There are multiple long duration energy storage technologies commercially available and ...

Director of Policy & Partnerships, Long Duration Energy Storage Council 29 November 2023. Agenda o About the LDES Council o The global need for long duration energy storage o LDES technologies o Example use cases o Policy & regulatory reform. ... \$350 million in Spain for LDES

Highview Power, a global leader in long duration energy storage solutions, announced today it is developing up to 2 GWh of long duration, liquid air energy storage projects across Spain for an estimated investment of around \$1 billion.

Long Duration Energy Storage Council Havenlaan 86C, box 204 1000 Brussels, Belgium ... forward to working with MITECO and IDAE to accelerate the markets for long duration energy storage and continue to support Spain's leadership as a renewable energy leader. Sincerely, Julia Souder . CEO . Long Duration Energy Storage ...

A new report by the Long Duration Energy Storage (LDES) Council says that thermal energy storage, or TES, has the potential to expand the overall installed capacity potential of LDES by to 2-8TW by 2040, versus 1-3TW without. This equates to a cumulative investment of US\$1.6-2.5 trillion, and would result in system savings of up to US\$540 billion a year.

The 2023 NECP proposes a 173% increase (or 85 GW) in renewable capacity by 2030 from current capacities¹; storage² is expected to increase by 487%, or 15 GW from installed capacity. Long Duration Energy Storage (LDES) can ensure renewable energy is utilised in the system while decreasing reliance on CO₂ emitting technologies

Annual Report 2024. In its inaugural Annual Report, the Long Duration Energy Storage Council presents a deployment roadmap to spur action among key stakeholders and decisionmakers. The report offers a current perspective and accounting on the global policy, regulatory and market environment for LDES, along with updated data and industry use cases.

The United Nations Climate Change Conference (COP29) was circled on the Long Duration Energy Storage Council's calendar since its date and location were announced nearly a year ago. The annual convening held this year in Baku, Azerbaijan, brought together world leaders, civil society, and representatives of industry, finance, climate ...

Spain long duration energy storage council

The inaugural Annual Report from the Long Duration Energy Storage Council calls for LDES to scale from the current 0.22 TW (terawatt) deployment pipeline up to an 8 TW target by 2040, a 50X scaling from today's pace that will be needed to support market development for LDES solutions and the decarbonization of global energy systems. To enable ...

The European Commission selects Energy Dome, in the most competitive European funding scheme, as a game changer in the energy transition. MILAN (December 22, 2022) - Energy Dome, the company behind the CO2 Battery, ...

Over 20 Years in Executive Public Policy Management, Strategy, Negotiation and... · Experience: Long Duration Energy Storage Council (LDES Council) · Education: University of Southern California · Location: Belgium · 500+ connections on LinkedIn. View Julia Souder's profile on LinkedIn, a professional community of 1 billion members.

To ensure that resilient communities have constant access to renewably sourced power, energy storage -- and specifically long duration energy storage (LDES) -- must be deployed at scale. Decarbonising Europe's energy systems requires both a migration to renewable energy infrastructure and the flexible transformation of energy markets to ...

In its inaugural Annual Report, the Long Duration Energy Storage Council presents a deployment roadmap to spur action among key stakeholders and decisionmakers. The report offers a current perspective and accounting on the global policy, regulatory and market environment for LDES, along with updated data and industry use cases.

Co-President of the Long Duration Energy Storage Council. Signing of statements of intent and launch ceremony The Long Duration Energy Storage (LDES) Council ... SPAIN 93GW 2025 125GW 2030 2027 +2.200M W submarine 15. 16 Example Spain: 15GW new synchronous generation open in Spanish Grid

The Clean Energy Council (CEC) has released a new report, "The Future of Long-Duration Energy Storage: Keeping the lights on in a carbon constrained world", which explores how emerging "alternative" long-duration energy storage (ALDES) technologies can firm renewables as coal generation retires.

Long-duration energy storage (LDES) offers a vital solution: deploying 15 GW would eliminate economic curtailment in Spain by 2035, accelerating progress to Net Zero and reducing power system costs. LDES could also play a pivotal role in decarbonising industry, with some thermal storage technologies delivering low enough heat costs to feasibly ...

Long Duration Energy Storage is the technology that enables renewable energy to power our grids and accelerate carbon neutrality. Through long duration energy storage we can transition towards renewable

energy in an affordable, reliable and sustainable way.

Julia Souder, chair of the Global Renewables Alliance and CEO of the Long Duration Energy Storage Council (LDES), agrees, describing the new energy storage target as "desperately needed to complement the renewable energy targets of COP28". ... the sentiment that policymakers need to help create better markets and update policies to ...

The LDES Council provides encouragement for the adoption of long duration energy storage and guidance on the implementation of the technology. Representing a wide spectrum of different technologies and approaches to energy storage, the Council provides analysis and background information along with facts on current deployment of long duration ...
