How many EV batteries does STB Giga produce a year?

By 2030, the StB Giga factory is expected to reach full production capacity of 2 GWh per year, producing around 18,000 EV batteries or 400,000 home battery systems annually. It plans to export 70% of its output to Australia, Southeast Asia and North America, with the remainder of its output to be distributed within the Philippines.

What is STB Giga Factory?

"StB Giga Factory is positioned to capture the once-in-a-century transition towards a renewable energy electricity system, in which LFP batteries are expected to play a pivotal role," St Baker said in a statement on Tuesday.

Who is STB Giga?

StB Giga is the first LFP battery factory in the Philippines, providing our customers with the most reliable products at the best price-point possible. We are thrilled to announce that our Omni 215 has been awarded Outstanding Innovation in Energy Storage Systems during Solar Week Vietnam 2024!

StB Giga Factory Inc. is planning to expand its battery manufacturing capacity in the country by adding two new factories. In a briefing, StB Giga Factory business development director Paulo ...

The factory, which will start its commercial operations next month, is set to generate two gigawatt-hours of batteries annually, potentially supplying energy to about 18,000 electric vehicles and close to 500,000 residential battery systems.

Thank you to the DTI Secretary Cris Roque. [Please take your seats.] Australian Ambassador to the Philippines Her Excellency Hae Kyong Yu; the StB Giga Factory Inc. Chairman Trevor Baker; the Bases Conversion Development Authority Chairman Thompson Lantion; Capas, Tarlac City Mayor Roseller Rodriguez; the Filinvest Development Corporation ...
