Today, on October 14th, Australian PV cell technology startup SunDrive Solar revealed a fresh collaboration with the Chinese solar manufacturer Trina Solar. This partnership involves the creation of a joint venture (JV) aimed at expanding manufacturing prospects in Australia. According to a company announcement, the joint venture will harness SunDrive's innovative ...

SunDrive is a solar technology start-up based in South Sydney, Australia. We're creating unique solutions to reduce the cost of high-efficiency solar cells, whilst enhancing their performance and sustainability by utilising more abundant materials. We've grown from a small PhD project in a garage to producing some of the most efficient solar cells ever made in the world.

Australian PV cell technology startup SunDrive Solar has revealed that it has undergone a restructuring of the company, resulting in job cuts, as it looks to "sharpen its focus on solar ...

The U.S. Environmental Protection Agency will send \$62.45 million to the territory for residential community solar and power storage projects, federal officials announced Monday. Awarded through the Solar for All grant program, the funding is meant to allow the Virgin Islands Energy Office to develop long-lasting solar programs that enable low ...

The innovative financing program offered Virgin Island resident's loans of up to \$30,000 to use towards the installation of solar photovoltaic (PV), and solar PV systems built in conjunction with battery storage.

Today the Prime Minister The Hon. Anthony Albanese MP and Minister for Climate Change and Energy, The Hon. Chris Bowen MP, officially opened SunDrive's solar manufacturing pilot production and commercialisation facility in Kurnell, NSW, today. For the first time in over a decade Australia has produced a mass-manufactured solar cell.

The adjoining solar facilities will provide a total of 140 MW solar capacity. The solar-plus-storage system is expected to fulfill 30% of the islands' energy consumption needs. According to the Department of Energy (DOE), ...

VIElectron, a renewable energy company that is building power infrastructure in the Virgin Islands with the support of Gov. Albert Bryan Jr. and government leaders, hosted a guided tour of the Petronella solar facilities on St. Croix, ...

SunDrive Solar, Australia's leader in solar innovation, and Trinasolar, one of the world's largest solar manufacturers, have signed a Memorandum of Understanding (MoU) to form a majority Australian-owned joint venture (JV). This JV aims to establish cutting-edge solar manufacturing capabilities in Australia.

Planned solar farms on St. Thomas and -- eventually -- St. John could bring that number up to \$400 million. "Right now, this power is 10.9 cents per kilowatt-hour," Loranger said. "If we can get federal funds to pay for it, it's in the Virgin Islands' hands -- it'll go to zero. Now, look what you can do with the power price.

In 2022, the average price of electricity paid by U.S. Virgin Island residents was almost three times higher than the U.S. average, at 41 cents per kWh.\* Add a Battery. Power your most needed lights and appliances during a power outage.

We're an award-winning solar energy company serving The U.S. Virgin Islands with a passion for clean, affordable energy. We offer a variety of renewable energy products for every home, every business, and every budget. Our team of solar energy professionals has over a decade of experience serving the people of the USVI and can tackle any clean energy challenge.

The USVI Solar+ Financing (SPF) Pilot Program is a loan program for residential solar PV and Battery systems being offered through the Virgin Islands Energy Office and the VI Water and Power Authority. Through on-bill repayment this program allows property owners to pay for renewable energy systems through their monthly utility bill.

The Virgin Islands Consortium was founded in 2014 by Ernice Gilbert and covers U.S. Virgin Islands and Caribbean news, politics, opinion, business, entertainment, culture and much more.

Solar for All The Virgin Islands SFA Program has the power to transform USVI's residential energy landscape, addressing residents' high electricity costs while creating new opportunities for energy resilience and reliable, affordable, clean power for communities most in need.
