What is the solar energy potential of Vietnam?

In terms of the solar energy potential, Vietnam is endowed with unique solar resources. The total technical potential of photovoltaic power generation is high as 1,646GW, of which 1,569GW is land-based photovoltaic and 77GW is water-based photovoltaic.

Is Vietnam a good place to invest in solar energy?

Vietnam has great potential for solar energy development, especially in the central and southern regions. The average annual sunshine hours in the central and southern regions are 2,000 to 2,600 hours/year.

Why is solar energy growing in Vietnam?

Support policies such as electricity price subsidies and tax exemptions are the key driving forces for the rapid growth of installed capacity of solar energy in Vietnam. Of course, Vietnam's current photovoltaic installed capacity is also restricted by the aging power grid that is unable to absorb green electricity.
