What does the Swedish Energy Agency do?

The Swedish Energy Agency participates in the international negotiations and in the Swedish business delegation. Electrification of the transport sector is progressing across the Nordic countries. Join us live on November 14 on a digital conference on charging infrastructure in a Nordic context.

Does Sweden have a good energy policy?

Sweden's energy policy is also well-integrated with its climate objectives, according to the latest review of the country's energy policies conducted by the International Energy Agency. In the 2016 Energy Agreement and the Climate Framework from 2017, Sweden set ambitious targets, including the long-term goal of zero net emissions by 2045.

How is Sweden transforming its energy sector?

Sweden has been successful in its energy transformation through market-based policies that focus on energy efficiency and renewable energy, notably CO<sub>2</sub> taxation, which has helped drive decarbonisation across several sectors.

Is Sweden ready for a 2030 Energy Transition?

However, Sweden is not yet on a trajectory towards its 2030 target, and the IEA recommends that the government closely monitors developments, and strengthens policy measures as needed. The electricity system is another important element in Sweden's energy transition.

How can Sweden achieve its energy goals?

Sweden has ambitious energy goals and is in a promising position to achieve them. It already has a relatively low emissions energy system as well as favourable natural resource endowments, a broad political and public consensus on its net zero ambitions, and a clear strategy to meet its goals (primarily through electrification of end-use sectors).

Will Sweden's electricity system be the cornerstone of its energy transition plans?

Sweden's electricity system will be the cornerstone of its energy transition plans. However, sizeable uncertainties exist in the long-term forecasts, including the scale of industrial electricity demand in the north, offshore wind development in the south, and the outlook for existing and new nuclear power plants.

Energy Grid: 98% carbon-free, with over 60% from renewable sources; Our expertise in circular economy and Industry 4.0, from IoT to AI, enhances waste reduction and energy efficiency. Business Sweden plays a crucial role in building global alliances to accelerate the shift towards climate-neutral energy and alternative energy sources.

goal--transforming to a zero ...

The Swedish Wind Power Alliance aims to increase collaboration between the Swedish and Taiwanese wind power sectors. With a primary focus to facilitate Swedish and Taiwanese trade and investment within the offshore wind and renewable energy sector, the Alliance provides a platform for sustainable energy collaboration.

All electricity consumed in Sweden is taxable. The energy tax rate for electricity continued to grow over the past decade. In 2021, the energy tax rate is 35,6 Swedish cents/kWh. However, not all companies are paying this rate. Swedish law and regulations provide specific tax reductions and exemptions to certain companies.

Sweden's legally binding 2045 net zero emissions target together with energy sector targets guide its energy policy. Net zero equates to an 85% cut in domestic greenhouse gas (GHG) emissions from 1990 levels (38% below 1990 levels in 2023), after allowing for expected absorptions.
