

Should large-scale solar PV farms be expanded in Sweden?

Stakeholders and organizations are now advocating a rapid expansion of large-scale solar PV farms, especially in Sweden's southern region. A 10-year PPA was signed by Centrica and re:cap global investors for two solar parks in Sweden developed by SunSpark, with a total installed capacity of 9.2 MW.

Can a wind farm be used as a solar park in Sweden?

European Energy has started constructing Sweden's first large-scale hybrid park in Skrämla in the municipality of Tingsryd, where the existing wind farm is supplemented by a solar park. By co-locating the plants, the land is used more optimally, and the electricity can be fed out via the same grid connection.

What is the largest solar-plus storage plant in Sweden?

For example, in December 2022, Alight and Tekniska Verken added 2 MW/2 MWh battery storage to a 12 MW solar park in Sweden making the site the largest solar-plus-storage plant in Sweden. Grants are being provided to standalone storage projects as well.

Did Sweden add more solar in 2023?

Official figures from Sweden's energy association says more solar was added than estimates suggested during a record year for PV deployment in 2023, with the country's cumulative capacity now standing at around 4 GW. Official statistics from Swedish energy agency Energimyndigheten say Sweden added approximately 1,600 MW of solar capacity in 2023.

How much solar power does Sweden have?

The figure is at least 200 MW higher than estimates reported on by pv magazine last month. Energimyndigheten says Sweden's cumulative solar capacity now amounts to approximately 4 GW. It adds that solar cell installations produce almost as much electricity as is used in the entire Uppsala county during a year, at around 3 TWh.

Is there a shortage of solar installers in Sweden?

Skill shortage: There is a shortage of trained installers, which could slow down the pace of solar energy adoption and implementation of renewable energy projects. Sweden has already reached its solar target in the current NECPs in force of 2.2 GW and has established a new target in its draft revised NECPs of 6.6 GW, 119% higher.

Official statistics from Swedish energy agency Energimyndigheten say Sweden added approximately 1,600 MW of solar capacity in 2023. The figure is at least 200 MW higher than estimates reported...
