The Taiwan Innovative Green Economy Roadmap (TIGER) Consortium focuses on engaging Taiwan-based industry leaders and MIT experts in developing a long-term, robust roadmap for Taiwan in its transition to a green economy based on innovative, low-carbon technologies.

The shift towards environment-friendly investments reflects the growing global focus in this area. In Taiwan, offshore wind farms and energy storage equipment are among the top priorities for investments. Offshore wind development began in 2018 with small-scale pioneer projects and sped up in the Round Two auction.

In Taiwan, many people are using the reliable high speed railway adopting the technologies of Japanese Shinkansen which has proved unparalleled safety and reliability. We expect that more people select environmentally friendly high speed railway as a result of introducing new rolling stock. About Hitachi, Ltd.
