Our own (blue) solar panel lifting bag measures 2200mm long and can handle loads to 200kg; whilst the red Pafbag version is slightly longer at 2400mm and can handle up to 500kg. Both options have incorporated lifting slings, although with the Pafbag model it is not stitched permanently but threaded through a channel thus replaceable. All bags ...

The majority of solar panel lifting bags are made with heavy-duty materials, with polyester webbing slings stitched in for the added strength and protection needed when lifting. Several designs can lift a maximum of 200kg, with a closed measurement of 220cm (width) and 120cm (high) meaning solar panel lifting bags can be used for multiple ...

The photovoltaic panel lifting artifact can be flipped

The unique design of the Pafbag solar panel lifting bag offers innovative features to enable solar panels and other frame type loads to be lifted with speed and efficiency. With a maximum safe working load of 500kg it is often the case that more than one panel can be lifted together.
