

# Timor-Leste energy resources llc

How much energy does Timor-Leste consume?

Timor-Leste produced 0.29 quadrillion BTU (293,968,074,000 BTU) of energy, covering 3,412% of its annual energy consumption needs. Energy production and consumption in Timor-Leste comes from various sources: 0.003% from nuclear and renewable sources and 99.997% from non-renewable fossil fuel sources (petroleum and other liquids, natural gas, and coal).

How much oil is in Timor Leste?

As onshore exploration begins at onshore blocks A & C in Timor Leste, independent assessments indicate that the block contains more than 127 million barrels of recoverable oil, with the profits being \$3.5 billion minimum, with the potential to triple as the onshore field reaches its potential.

Does Timor-Leste have electricity?

Timor-Leste has rapidly expanded electricity access to more than 83 per cent of the population but the country has yet to achieve energy security. Consumer costs, even with government subsidy, remain high and outages are common. In addition, most of Timor-Leste's electricity is generated through costly and polluting diesel generators.

Is Timor-Leste a good country for solar energy?

Timor-Leste has a high-quality solar resource. The global horizontal irradiance in Dili is higher than on the east coast of Australia, where the solar market is mature and installation costs are higher. The cost of electricity in Timor-Leste for commercial and industrial consumers is high compared to ASEAN countries.

Is there a market for roof-top solar energy systems in Timor-Leste?

Australia's Market Development Facility (MDF) and ITP Renewables conducted an assessment of the potential market for roof-top solar energy systems in Timor-Leste.

Do Timor-Leste businesses experience electricity outages?

Research shows that nearly all businesses in Timor-Leste experience electricity outages, in some cases multiple times a week. Outages affect businesses in different ways: For tourism businesses, it impacts customer experience (internet, device charging, air conditioning and fans, food quality, and inability to refuel diving tanks).
