Pele Energy Group was founded by five young Africans whose sole emphasis and focus at the time in 2009 centred around youth regeneration and development. As black South Africans born in the 1980's, we were clearly mindful and aware of the relative privilege in our own personal lives and upbringing in comparison to the majority of young black ...

Pele Energy Group is a sustainable development company focused on renewable energy and advisory services within the energy sector. The company owns and operates renewable energy infrastructure and provides economic and community development advisory services.

Energy independence: By increasing the country's renewable energy capacity, solar projects can reduce dependence on imported energy sources and improve energy security. Lower energy costs: Solar power can be a more cost-effective energy source for the mine, especially in the long term, leading to reduced operating costs.
