

Tonga energy synergy

How can Tonga transform its energy sector?

The Government of Tonga has formulated targets to transform its energy sector by achieving a 50 percent share of renewables in the country's energy generation mix by 2020 and 70 percent by 2030. However, achieving these targets require catalytic investments to transform the country's energy infrastructure.

How much energy does Tonga generate?

It accounts for 90 percent of its electricity generation. The Government of Tonga has formulated targets to transform its energy sector by achieving a 50 percent share of renewables in the country's energy generation mix by 2020 and 70 percent by 2030.

How will Tonga move away from fossil fuels?

This project aims to help Tonga move away from fossil fuels and shift to renewables. The project will deliver utility-scale storage systems to provide base load response and grid stability, paving the way for more renewable energy integration in the main island, while green mini-grids will be installed in the outer islands.

What is the Tonga energy roadmap (term plus 2021-2035)?

The launch of the Tonga Energy Roadmap (TERM Plus: 2021-2035) framework provides a blueprint for MEIDECC for the development and eventual implementation of the roadmap.

What is the Tonga energy framework?

The Framework will be used to advance a series of conversations with national stakeholders, investors and development partners to generate history-making trajectories that are relevant and in line with best practices to achieve Tonga's energy targets.

Is Tonga a climate resilient country?

Shifting electricity production in Tonga to a low-carbon, climate resilient path. Tonga is the second most climate vulnerable country in the world. Like many other Small Island Developing States in the Pacific, Tonga's energy source is almost exclusively imported diesel. It accounts for 90 percent of its electricity generation.

The Asian Development Bank (ADB) and the governments of Solomon Islands and Tonga have signed grant and loan agreements for energy projects on the sidelines of COP29. The ADB-supported projects will help the Pacific countries to transition from dependency on diesel fuel imports to renewable energy.

Synergy's Albany wind farm, a Bright Energy Investments joint venture and part of the Albany Grasmere Wind Farm, is an accredited energy supplier for the GreenPower program and is cutting Australia's greenhouse gas emissions by 65,000 tonnes per annum. That's equal to taking nearly 15,000 cars from our roads for one year.

Tonga Renewable Energy Project (TREP) has three components: (i) a large BESS capacity on Tongatapu to ensure that the intermittent electricity generated from solar photovoltaic and wind power to be funded by private independent power producers can be stored and used overnight without negatively affecting Tonga Power Limited's grids; (ii) electricity ...

in energy equivalent units (ex. kcal, toe, joule etc.). Neither of these indicators can be found in any official publications, domestically or internationally, even in the "Tonga Energy Road Map 2010-2020". The energy flow explains in terms of quantity 1) ...

The Tonga Grid Enhancement for Sustainable Energy Transition Project aims to help the Government of Tonga meet its 70% renewable energy target by constructing a new 33 kilovolt (kV) electricity network to evacuate energy from a solar power plant and upgrading a portion of the existing 11 kV network. The project will strengthen the capacity of ...

This project aims to help Tonga move away from fossil fuels and shift to renewables. The project will deliver utility-scale storage systems to provide base load response and grid stability, paving the way for more ...

Mr. Tuifio Finau was appointed Commissioner of the Tonga Energy Commission in October 2021 View Profile »»»»; Dr. Lia Maka was appointed Commissioner of the Tonga Energy Commission in September 2022.

Nuku'alofa, Tonga: Tonga is currently using 27% of renewable energy as a source of power, the Department of Energy (MEIDECC) said, in marking the International Day of Clean Energy, on Friday, 26 January, as declared by the United Nations.
