Who is Trident Energy?

Behind our name is a proven and sustained track record of large scale asset take-overs and production enhancement. © Copyright Trident Energy 2024 All rights reserved. Trident Energy is one of the industry's most experienced teams in the science of operating and redeveloping mid-life oil and gas assets.

Is Greenland a potential E-Fuels hub?

Greenland's transition from a fossil fuels-based system to a 100% renewable energy system between 2019 and 2050 and its position as a potential e-fuels and e-chemicals production hub for Europe, Japan, and South Korea, has been investigated in this study using the EnergyPLAN model.

Why is Greenland so vulnerable to oil prices?

Greenland's energy system is very vulnerable to oil prices, as it relies on imported oil. Rich wind resources complementary with solar resources may enable a transition to a sustainable and self-sufficient energy system.

Does Greenland have a decentralised energy system?

No comprehensive study on Greenland has been found, as existing studies focus on small individual communities. Such studies provide a tailored perspective on decentralised energy systems, considering local climate conditions, energy demand, and quality of local renewable resources.

Does Greenland have a diesel price?

Therefore the consumer diesel price in Qaanaaq is the same as in the much farther south Nuuk. The only tax imposed on fuel is a small environmental tax, unlike Denmark and other European countries that apply energy, CO<sub>2</sub>, NO<sub>x</sub>, and value added taxes. The consumer price of fuel in Greenland is therefore very low compared to Europe.

Is Greenland a good place for offshore wind power?

However, a study on wind and wave power potential on 22 islands has found Greenland to be one of the best sites for offshore wind power with 4555-5450 full load hours (FLH) in addition to good conditions for wave power with 1050-4000 FLH. Satymov et al. found 5000-6000 FLH in the south of Greenland for an improved wave energy converter.

In the Trident Energy Sustainability Report 2023, we outline the work carried out throughout the year and the good progress we have made towards reducing our carbon intensity by 50% by 2030. Code of Conduct Sustainability Report 2023 (English only)
