

Trinidad and Tobago solar co za

Why are solar PV systems so popular in Trinidad and Tobago?

This makes the Solar photovoltaic (PV) systems very applicable for Trinidad and Tobago. The cost for these systems are constantly coming down. The government is encouraging the use of Solar energy through tax incentives, thus making PV systems more attractive for domestic and commercial use.

Who is building the largest solar project in Trinidad and Tobago?

Today, the Government of Trinidad and Tobago has officially given the green light to project partners, bp, Shell and Lightsource bp to begin construction of the largest solar project in the Caribbean.

What is Lightsource BP's Solar Project in Trinidad and Tobago?

The proposal involves a consortium of Lightsource bp, bp and Shell working together to develop a solar installation that will have an output power capacity of 92MW (Megawatts) in Trinidad and Tobago. Watch a summary of activity from our worldwide solar development projects in 2023, as we work towards achieving our target of 25GW by 2025.

What is Lightsource doing in Trinidad and Tobago?

Learn more about some of our projects, our partners and the benefits we're bringing to businesses and communities in Trinidad and Tobago. The proposal involves a consortium of Lightsource bp, bp and Shell working together to develop a solar installation that will have an output power capacity of 20MW (Megawatts) in Trinidad and Tobago.

Who were the speakers at the Trinidad & Tobago Conference?

Also speaking at the event were David Campbell, President of bp Trinidad and Tobago and Eugene Okpere, Senior Vice President and Country Chair of Shell Trinidad and Tobago, The Minister of Public Utilities Marvin Gonzales and Chairman of T&TEC, Romney Thomas.

Trinidad and Tobago The proposal involves a consortium of Lightsource bp, bp and Shell working together to develop a solar installation that will have an output power capacity of 92MW (Megawatts) in Trinidad and Tobago.

Sosolar, based in Johannesburg, offers innovative solar solutions, including solar cooking, lights, and power systems. Their durable solar cookers provide an eco-friendly, safe, and cost-effective way to cook, boil water, and bake using only sunlight. By switching to solar cooking, individuals can reduce their carbon

In Trinidad and Tobago and the wider Caribbean there is an abundance of natural energy from the sun. In Trinidad and Tobago a typical day can be insolated for 5-6 hours of sunlight. This makes the Solar photovoltaic (PV) systems very applicable for Trinidad and Tobago.
