

Trinidad and Tobago energy

Where does Trinidad and Tobago get its energy from?

This page is part of Global Energy Monitor's Latin America Energy Portal. Trinidad and Tobago derives almost all of its energy from domestically produced hydrocarbons, especially natural gas.

How does Trinidad and Tobago's energy sector affect economic growth?

The performance of Trinidad and Tobago's energy sector has far-reaching implications for the country's macroeconomic indicators and fundamentals such as fiscal stability, export earnings, foreign exchange reserves and overall economic growth.

Who owns the energy in Trinidad & Tobago?

In 1994, it divested from its generation holdings on the larger island of Trinidad and now purchases energy from three Independent Power Producers (IPPs): the Power Generation Company of Trinidad and Tobago, which purchased the former T&TEC-operated plants and presently controls 1,386 megawatts (MW) of gas-fired capacity across

Who regulates the energy sector in Trinidad & Tobago?

The MEEI (Ministry of Energy and Energy Industries) manages Trinidad and Tobago's oil, gas, and mineral resources. The MEEI is responsible for monitoring, controlling, and regulating the country's energy and mineral sectors. The Regulated Industries Commission also serves as a regulator for the energy sector.

Does Trinidad and Tobago have fossil fuel resources?

Trinidad and Tobago has abundant local fossil fuel resources, but is taking steps to prepare the societal, legal, regulatory, and economic foundations necessary to support renewable energy and energy efficiency technologies.

Does Trinidad & Tobago need energy subsidies?

Unlike many island nations, Trinidad and Tobago has significant oil and natural gas reserves and is a net exporter of these fuels. However, subsidies for domestic energy consumption have created a fiscal burden on the government that could be reduced through the expansion of alternative transportation fuels, energy efficiency, and renewable energy.

Targets Renewable Energy Energy Efficiency Transportation In Place Proposed Prepared by the National Renewable Energy Laboratory (NREL), a national laboratory of the U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy; NREL is operated by the Alliance for Sustainable Energy, LLC.

Based on this validation, and given the announcement by the Honourable Prime Minister of Trinidad and Tobago, Dr. Keith Rowley at the recently convened World Leaders' Summit at COP 26 in Glasgow, Trinidad and Tobago has increased its goal to having 30% use of renewable energy by the year 2030.

Trinidad and Tobago energy
