Who is Trina Solar?

Founded in 1997,Trina Solar is the world's leading total solution provider for solar energy. With local presence around the globe,Trina Solar is able to provide exceptional service to each customer in each market and deliver our innovative,reliable products with the backing of Trina as a strong,bankable brand.

Why should you choose Trina Solar?

With local presence around the globe,Trina Solar is able to provide exceptional serviceto each customer in each market and deliver our innovative,reliable products with the backing of Trina as a strong,bankable brand. Trina Solar now distributes its PV products to over 100 countries all over the world.

How much does a solar panel weigh?

There are considerable weight differences depending on the exact brand and model of solar panel you buy,but on average they range from 16kg to 24kg. This means that they are certainly not always lightweight and it's often only safe to install them in pairs or by teams,hence why professional installation is always advised.

96-cell solar panel size. The dimensions of 96-cell solar panels are as follows: 41.5 inches long, and 63 inches wide. That's a 63&#215;41.5 solar panel. This form is a bit shorter but wider. This is the typical classification of solar panel sizes (based on the solar cell size). It's a bit theoretical and quite useless for most calculations.

Solar Panel Size Advantages and Disadvantages Advantages of Larger Solar Panels. High output - larger panels have more cells and, therefore, capture more solar energy; Higher efficiency - larger panels have cells occupying space that would otherwise be occupied by empty space or framing with smaller panels; Greater value for money - More power for on a ...
