

Tritium power solutions Nepal

Does tritium have a regenerative power testing facility?

In 2021, Tritium launched a state-of-the-art testing facility at its Brisbane headquarters. The facility features one of the highest-power commercially accessible EMC testing chambers in the world. It's designed to deliver up to 720kW of regenerative power from its integrated system with fully integrated AC and DC power feeds.

Is tritium a good brand?

With over 13,000 DC Fast Chargers sold in 47 countries, Tritium is recognised as a leading industry brand globally. Founded in 2001, Tritium designs and manufactures proprietary hardware and software to create advanced and reliable liquid-cooled DC Fast Chargers for electric vehicles.

What is the tritium E-Mobility Innovation Centre?

The Tritium E-Mobility Innovation Centre in Brisbane, Australia, is part of a major expansion of Tritium's headquarters. The shift to the new facilities will help increase production rates and allow for much faster time-to-market, while further enabling the rapid development of technologies which will continue to shape the EV roadmap worldwide.

Is tritium a fast charger?

Established in 2001 to provide power-electronic systems and battery energy-storage applications, Tritium became one of Australia's fastest-growing companies with the launch of its first DC fast charger in 2014. Since then, Tritium has become a leading global DC fast charging (DCFC) supplier with installations in more than 29 countries.

How many Chargers does tritium produce a year?

The factory will employ more than 500 people and is designed to produce up to 30,000 DC fast charger units per year. Tritium continues to develop faster, higher-capacity chargers for electric vehicles and our team works tirelessly to electrify transportation around the world.

What are some alternatives to tritium?

Alternatives and possible competitors to Tritium may include Zero Motorcycles, Tork Motors, and Uber Advanced Technologies Group. Tritium designs and manufactures proprietary hardware and software to create DC fast chargers for electric vehicles.
