

Trump approves solar power plant

Does Trump support renewables?

Trump vociferously favors fossil fuels and has criticized renewables, especially wind power and electric vehicles. But renewables have powerful corporate champions and trade associations with support across the aisle in Washington, D.C.

Why did Trump increase tariffs on solar energy equipment?

The first Trump administration expanded Obama-era tariffs on solar energy equipment, giving a boost to domestic manufacturers that are critical to the fastest-growing source of new electricity generation on America's grid.

Does Donald Trump support a shift in energy policy?

(REUTERS/Jonathan Ernst) Donald Trump has made clear in his campaign that he supports a significant shift in U.S. energy policy, characterized by a robust emphasis on fossil fuels, extensive regulatory rollbacks, and a scaling back of renewable energy policies.

Could plug power be a 'green' energy source under Trump?

Plug Power produces electrolyzers and other components needed to make hydrogen from electricity, a zero-emissions source of energy that could take a hit under Trump. The DOE loan would provide funding to help the company build up to six "green hydrogen" plants.

How will a second Trump presidency affect the solar industry?

The president-elect ran a campaign of characteristically emotive rhetoric and sloganeering - notably, to "drill, baby, drill" for oil and gas - but the real-world impact of a second Trump presidency on the US solar industry remains uncertain.

Should a Trump administration prioritize energy projects?

"For the projects that are ready, it would probably do them well to prioritize the projects that they want to move forward that they don't think a Trump administration would," said Kennedy Nickerson, a former policy adviser at the loan office who is now a vice president of energy at Capstone, an investment research firm.

The facility is expected to produce 690 megawatts of electricity -- enough power to supply about 260,000 households in the region and offset the greenhouse emissions of about 83,000 cars annually.

Despite his praise for solar energy, Trump also criticized the amount of land required for solar plants, highlighting the complexities of the energy debate in the United States. The Changing Landscape of Solar Power. Trump's acknowledgment of solar power comes at a time when the U.S. solar industry is experiencing both growth and challenges.

Trump approves solar power plant

The estimated \$1 billion Gemini Solar Project could be the eighth-largest solar power facility in the world when finished. ...
