

What is a photovoltaic power plant in Tunisia?

In Tataouine, in the governorate of Tunisia that goes by the same name, a photovoltaic power plant is in operation that can reach a maximum installed capacity of 10 MW to supply more than 20 GWh of energy per year to the national grid. The plant is equipped with a solar tracking system that optimises the energy that is produced.

Is Tunisia making progress in solar energy?

Tunisia is making progress in the expansion of solar energy. The country is home to the first floating photovoltaic (PV) park in the Middle East and North Africa which went online near the capital Tunis in June with an expected annual generation of 265 MWh.

Will Tunisia be able to generate 30% of its electricity by 2030?

Tunisia has a target of generating 30% of its electricity from renewable energy sources by 2030. The south of the country, where our Adam and Tataouine power plants are located, is an ideal area for solar power generation.

Why should you invest in solar power in Tunisia?

Nur Energie has built and maintained a solar weather station for 3 years on the TuNur site to receive real time solar data on the ground. Tunisia has up to 20% better radiation than some of the best sites in Europe, and the Sahara desert provides significant land to develop large scale solar power projects.

What is TuNur energy doing in Tunisia?

In Tunisia, Nur Energie is developing the world's first CSP solar export project between North Africa and Europe. For more information about the TuNur project please visit the TuNur company website:

What is TuNur energy?

Nur Energie has been present in Tunisia since 2008 working with local Tunisian and Maltese partners and investors to contribute to the solar energy industry in the region. The TuNur project consists of a 2,250 MW solar CSP power plant in the Sahara desert and a 2 GW HVDC submarine cable from Tunisia to Italy.

The episode, titled "Solar System: Volcano Worlds," investigates the giant volcanic mountain, Olympus Mons, which stands proudly on Mars, reaching heights more than double that of Mount Everest. Moving closer to the Sun, the narrative turns to Venus, where thousands of volcanoes contribute to its boiling temperatures by producing a toxic ...

UK govt unveils action plan for clean power system. 6 days ago. Tunisia plans 1.7 GW of renewable energy projects. ... Qair turns sod on 20-MWp solar park duo in Tunisia. Dec 13, 2024. Most read stories. Offshore Wind. ...

Show title: NOVA Video title: Solar System: Volcano Worlds Preview Video duration: 0m 30s Video description: Around our solar system, violent eruptions are shaping distant worlds. Discover the explosive forces that helped create ...

The first solar photovoltaic system on the island Djerba, in south-eastern Tunisia, was inaugurated yesterday. Located in the Ajim delegation, this one megawatt plant will provide electricity to 500 homes and contribute to the North African country's strategy to reduce greenhouse gas emissions, according to the project promoter, Jamil Maamer .

The plant is equipped with a solar tracking system that optimises the energy that is produced. The project ...

Take a journey across the galaxy and explore fascinating wonders that typically go unnoticed on planets across our solar system. From wandering spatial bodies, to otherworldly volcanoes, this season of "NOVA" is filled with the lesser-known marvels of the solar system. Watch the special mini-series, "NOVA: Solar System," every Wednesday this month at 8 p.m. or stream ...

NOVA | Promotion | Solar System: Storm Worlds Preview. Out in the solar system, the weather gets wacky - with globe-spanning dust storms, monsoons of liquid methane, and lightning 10 times stronger than here on Earth. Discover the forces driving the dramatic weather on neighboring planets and moons.

Tunisia Energy minister Neila Gonji pushes industry towards renewable electricity. The Tunisian government, which is under pressure from its lenders and high gas prices, is trying to speed up construction of new wind and solar power plants, particularly those destined to supply electricity to cement and other industrial producers.

In Tataouine, in the governorate of Tunisia that goes by the same name, a photovoltaic power plant is in operation that can reach a maximum installed capacity of 10 MW to supply more than 20 GWh of energy per year to the ...

From a dwarf planet that looks like a deflated football, to a tiny moon with cliffs taller than Mt. Everest, to the spectacular rings of Saturn, learn how the effects of gravity produce the amazing variety of weird worlds in our solar system.

On May 8, Voltaia announced that it had won a 130MW solar project in Tunisia in the Gafsa region. This facility will produce enough electricity to meet the needs of more than 700,000 residents. This flagship project will benefit from a 30-year electricity sales contract, signed with STEG, the Tunisian public network operator.

Tunisia has signed two agreements with Norway and Japan for the construction of solar power plants in the regions of Sidi Bouzid and Tozeur. The signing ceremony, held yesterday, was presided over by the Minister of Energy, Mines and Industry, Fatma Thabet Chiboub, and by the general director of the Tunisian Electricity and Gas Company (Steg ...

This model of the solar system, it's missing all of the most interesting bits. NARRATOR: What secrets do these wandering worlds reveal about our solar system? And what else is lurking out there in the dark? (bursting) "Solar System: Wandering Worlds," right now on ...
