

Tuvalu solar energy co ltd

What is the Tuvalu solar power project?

The Government of Tuvalu worked with the e8 group to develop the Tuvalu Solar Power Project, which is a 40 kW grid-connected solar system that is intended to provide about 5% of Funafuti's peak demand, and 3% of the Tuvalu Electricity Corporation's annual household consumption.

Where does Tuvalu electricity come from?

Tuvalu's power has come from electricity generation facilities that use imported diesel brought in by ships. The Tuvalu Electricity Corporation (TEC) on the main island of Funafuti operates the large power station (2000 kW).

What was the first large scale solar system in Tuvalu?

The first large scale system in Tuvalu was a 40 kW solar panel installation on the roof of Tuvalu Sports Ground. This grid-connected 40 kW solar system was established in 2008 by the E8 and Japan Government through Kansai Electric Company (Japan) and contributes 1% of electricity production on Funafuti.

How many inhabited islands are in Tuvalu?

It is somewhat complicated because Tuvalu consists of nine inhabited islands. The Tuvalu National Energy Policy (TNEP) was formulated in 2009, and the Energy Strategic Action Plan defines and directs current and future energy developments so that Tuvalu can achieve the ambitious target of 100% renewable energy for power generation by 2020.

Shenzhen Di Sheng Energy Technology Co., Ltd. was founded in 2009, is China's most professional manufacturer of small solar modules and solutions provider. Tel: 0755-29191169 / 29191189 18923848794
Welcome to Shenzhen Desun Energy !

Decreasing reliance on fuel and enhancing renewable energy-based electrification in the small island state of Tuvalu. E8 funded project. The E8 comprises of 10 leading electricity companies from the G8 countries promoting sustainable energy development through electricity sector projects and human capacity building activities in developing ...

The NZ Ministry of Foreign Affairs and Trade funded project was the first to combine solar generation and battery storage on the island. It is likely to be a model for further projects as Tuvalu moves towards its goal of 100% renewable energy generation by 2025.

Renewable energy in Tuvalu is a growing sector of the country's energy supply. Tuvalu has committed to sourcing 100% of its electricity from renewable energy. This is considered possible because of the small size of the population of Tuvalu and its abundant solar energy resources due to its tropical location.
