

# Varo energy British Virgin Islands

Why is Varo investing \$3.5 billion in a twin-engine strategy?

They want a partner that moves with them, one that can advise and provide a wide range of energy and decarbonisation solutions from a single company. That is why VARO plans to invest \$3.5 billion in the next five years in our twin-engine strategy, with around two-thirds of that investment focused on Sustainable Energies.

What does Varo say about the energy transition?

Commenting on the announcement Dev Sanyal, VARO CEO, said: "Our customers' needs are changing fast as they adapt to the Energy Transition while expecting reliability of supply."

Is Varo reducing its impact on the environment?

VARO is committed to minimizing its impact on the environment. We have set a sector-leading objective to become Net Zero by 2040 with intermediate milestones.

How will Varo develop hydrogen production hubs?

Hydrogen: leverage position as H<sub>2</sub> consumer to develop hydrogen production hubs. In the initial phase, VARO will invest in an electrolyser at Bayernoil Refinery, with offtake meeting part of the demand from the refinery. Additional green and biogenic production could lead to offtake opportunities for industry, heavy transport and synthetic fuels.

What will Varo do in the e-mobility era?

In the initial phase, VARO will invest in an electrolyser at Bayernoil Refinery, with offtake meeting part of the demand from the refinery. Additional green and biogenic production could lead to offtake opportunities for industry, heavy transport and synthetic fuels. E-mobility: turnkey charging solution for customers transitioning to E-mobility.

What will Varo do in 2026?

Target >250kt p.a. of net biofuels capacity by 2026 with long-term ambition to reach > 500kt p.a. Biomethane & LNG: leading producer of biomethane and bio-LNG. VARO will develop portfolio through both acquisition and greenfield development to strengthen offers to industrial and road transport sectors.

As of 2022, the electricity consumption in the British Virgin Islands is heavily reliant on fossil fuels, with 100% of its electricity being generated from these sources. This complete dependency on fossil energy means that there is currently no contribution from clean energy sources such as nuclear, wind, or solar. Reliance on fossil fuels not only contributes to climate change ...

VARO Energy Group has appointed Fatemeh Rezazadeh, effective August 1 2022, to the newly created position of Vice President of Hydrogen. VARO Energy has a new strategy to become the partner of choice for
