

That's a possible solution for someone with that specific setup. Unfortunately, I use a 3 phase Harvi to wirelessly monitor solar production. I could probably rig up a CT arrangement on the supply to the V1 Zappi from the V2, but then I would not have any control over the ability to just charge from solar, as the V2 Zappi cannot talk to my V1 ...

4 ???· Originally, we offered eight zappi variants: four 7kW single-phase units, available with either tethered or untethered cables in black or white, and four 22kW three-phase models, also available in both cable types and colours.

additional support for 3 phase systems, allowing connection of a single phase zappi in a 3-phase 3-wire supply, and to allow the ECO+ mode to be used on a three-phase zappi with all three phases energised. The way i read it, this allows the Zappi 1 to be able to be used with 3-phases, which is not possible. <Confused> Richard

Zappi versions that do not have the -T suffix comply with EN 61851-1:2019 with the exception of Clause 8.4 in order to meet the requirements of BS 7671:2018 Amendment 1:2020 which requires the protective earth conductor to be ...

In case of a PEN fault, zappi becomes completely isolated from the input supply. That means that all conductors present at the output socket or cable - including protective earth and control signals - will be safe removing any risk of potential electric shock. zappi meets the requirements of BS 7671:2018, 722.411.4.1 (v).

All controllable by the myenergi APP. No PV? No Problem!! If you don't have a PV system, zappi can still operate like an ordinary EV charging station importing from the grid. You can always add your solar/wind system later. FEATURES. ...

Set device priority so that Zappi is #1 and Eddi is #2. Your myenergi system should then behave as you wish.

Zappi myenergi Western Sahara

Note that the Eddi may consume the available surplus before there is enough for the Zappi. The Zappi needs a minimum of 1.4kW for single phase and 4.2kW for three phase.

You may set the Zappi "green level" to 100% but I suspect you will never or rarely get a purely solar charge as the output of your solar panels is not enough. Or you may set the green level to a lower level e.g. 50% and take a mixture of 0.7kW of solar and 0.7kW of grid to get to the minimum 1.4kW the car needs to start charging, but that will ...

Introducing, zappi 2.1 Multiphase Originally, we offered eight zappi variants: four 7kW single-phase units, available with either tethered or untethered cables in black or white, and four 22kW three-phase models, also available in both cable types and colours.

The Zappi Mode is only defined as a Select entity (select.myenergi_ev_charge_mode). It can be changed on a Dashboard but it does not change the status in the App or on the Zappi.; afterward a short period it is reset to the current status. The integration provides Services for boosts but the mode change. I am simply seeking some ...

Come on guys, its a great unit but you can do better than this. I think the unit is great but the manual supplied for the Update process must be for the Zappi 1 as it bore no relation to the switches on the Zappi 2. I did download the latest firmware to the Hub as instructed and found the bootloader menu in the Advanced options on the Zappi.

Thanks to the myenergi zappi, charging your electric car at home is easier, cheaper and more environmentally friendly than ever before. Choose your perfect zappi today. Offering future-proof, intelligent car charging at your fingertips, zappi is the UK's #1 ...
